

**Exploration Activity – Secure Wi-Fi: eduroam**

In this course, we encourage you to avoid using dubious public Wi-Fi. If you must use a public Wi-Fi, then make sure you choose a provider that is reliable and use VPN for better protection. For your information, there is a provider called eduroam, which focuses on providing secure world-wide “roaming” Wi-Fi service for international research and education community. Read more about eduroam here: <https://www.eduroam.org/what-is-eduroam/> and where you can get connected here: <https://www.eduroam.org/where/>.

CUHKSZ is a member of eduroam. This means you may access eduroam wireless networks at participating educational and research institutions around the world using your CUHKSZ credentials. Visit our ITSO webpage for more details on how to get connected: <https://itso.cuhk.edu.cn/en/node/170>. Here is a simple example. Assume that you visit Harvard University and would like to connect to Wi-Fi. Based on the following diagram, you should choose eduroam!
